

LaRC ENVIRONMENTAL MINUTE

Standard Practice and Environmental Engineering Branch (SPEEB)

Environmental Management System

ENVIRONMENTAL MANAGEMENT SYSTEM (EMS)

NASA Langley's EMS provides a systematic approach for evaluating and addressing the Center's most significant environmental impacts and risks, as well as potential benefits.

The focus of the EMS at LaRC is to continually improve environmental performance and maintain compliance with applicable legislation and regulations, as well as other requirements to which LaRC subscribes.

How can you help?

- Know LaRC's environmental policy (LAPD 8500.1)
- Be familiar with LaRC's annual High Priorities, which are available at: <https://emis.ndc.nasa.gov/EMS.cfm>
- Comply with environmental requirements associated with your activities (LPR 8500.1)

The EMS is not solely owned and operated by the LaRC Environmental Office — **ALL** of LaRC's employees play an important part in promoting environmental stewardship at LaRC and ensuring the success of the EMS!

Ensure Compliance **A**lways Improve **R**educe Pollution **T**hink Sustainably **H**eighten Awareness
